A AK's Program ended June 30, 2004.

B FL - # of claims represents combination of reimbursement claims prior to 1997 and preapproval work orders and task assignments from 1996 to date.

C GA: This number was reported in error in previous years. The number has increased due to previous exclusions of facilities that were closed but had active releases and were in the fund. We have corrected our query and reported the correct number for 2009.

D ND does not separate 1st party and 3rd party.

E OK-# of Claims Received is now compiled differently, and only relates to claims for actual Cases; new database recently - numbers may be slightly different.

F Amount indicated is the amount per site. Payments were made for 4,394 sites since 1988.

G Commercial Underground Storage Tank Program.

H Oil Heat Program

I WV's Program ended 9/30/2000

**TABLE 3. LEVEL OF ACTIVITY IN STATE FINANCIAL ASSURANCE FUNDS**

State	Total # of Sites	Claims Processing Experience to Date										Average Cost Per Site			Estimated Processing Time (months - submission to payment)	# of Claims formally Appealed

				Received	Processed	USTs		ASTs		Total		USTs	ASTs	Total			
						annual	total	annual	total	annual	total					annual	cummulative

**Table 3 Definitions:**

**Total # of sites:** Any location where there has been a release of petroleum from a UST (and above ground tanks if included in your fund).

**claim:** Any request for reimbursement or payment from a fund. Some states allow for claims to be filed on an ongoing basis during site cleanup, while others require claims to be filed only after certain milestones are reached (e.g. - site investigation completed claim, site cleanup completed claim). For this survey, any request for payment is considered a claim and includes both cleanup and third party claims. Please put unknown if your state does not track individual claims.

**Average cost per site:** this is the total funds expended on federally regulated UST sites divided by the total number of sites where there were expenditures. This is not a measure of the average cost per site at site closure (closure means the point when the site has been cleaned up to the state's criteria, and not tank closure).

**Average cost per site at completed cleanup sites:** this is the total spent from the fund on federally regulated UST closed sites divided by the total number of sites in the fund that have reached closure (closure means the point when the site has been cleaned up to state's criteria, and not tank closure). This does not include any deductible amounts paid by the tank owner.

**Estimated processing time:** this is the total time it takes from when a claim is received to the time it takes to issue payment. This should include all the review time necessary before the claim is processed for payment.
